Product Description

The SST™ PB3 Remote Module for PROFIBUS is a “Linking device” with on-board Profibus and Ethernet communication ports that provide a fast and easy solution for adding Profibus Master and Slave connectivity to Rockwell Logix controllers (CompactLogix, SoftLogix). This unique remote concept offers the same features as an in-chassis module but with extra functionalities and services due to its flexible remote design. For example, the PB3 Remote Module reduces the cost of expensive Profibus cabling when used in environments where controller and field devices are a long distant apart.

Mainly Products

| | |
|-----------------|------------------------------|
| PLC module | Redundancy Module |
| DCS module | Analog input module |
| CPU module | Analog output module |
| IO module | Digital input module |
| DO module | Digital output module |
| AI module | Relay Output Module |
| DI module | Relay Input Module |
| Power Module | Motion control module |
| Ethernet module | Network communication module |

Application

- 1.Power industry, the elevator industry, parking, automobile, auto ancillary.
- 2.feed industry, aluminum smelting machines, refrigeration industry.
- 3.steel industry, combustion control systems, non-ferrous metal smelting.
- 4.glass industry, construction machinery, textile machinery, water treatment

Best Services Assurance

- 1.High quality

- 2.Fast Delivery
- 3.We provide a large number of brand new in stock.
- 5.There are many products in stock.
- 6. We only provide the original new items, 100% make sure the best quality!
