Product Description

Product Description

Bently Nevada 3500/53-03-01 Overspeed Detection System Card

Technical Application

Bently Nevada's Electronic Overspeed Detection System for the 3500 Series Machinery Detection System provides a highly reliable, fast response, redundant tachometer system intended specifically for use as part of an overspeed protection system. It is designed to meet the requirements of American Petroleum Institute Standards 670 and 612 pertaining to overspeed protection. 3500/53 modules can be combined to form a 2-out-of-2 or 2-out-of-3 (recommended) voting system. The use of redundant power supplies in a 3500 rack containing the Overspeed Detection System is required.
